

A Money Trainers Money Tip Sheet

In this Tip Sheet **the one and only thing you need to do in order to improve your personal finances and your long term financial situation.**

Take some action. Buy one share. Don't buy that new [insert purchase here]. You have no idea what your future situation is going to look like, you have no idea where you will be, what will happen to the markets. We are not able to read the future.

But we do know this, once you have spent that fiver instead of investing it. Once you have watched another series on Netflix, lazed around on Saturday afternoon you will never get the time back nor will the money come back to you.

You and I also know that a storm is coming, either in the job market, that family, with your own health. Because they always do, we can't prevent them. We have to accept that one day it will come. That fiver, that investment, the time you spent improving your skills will all be there waiting to be used to solve the future problem.

If you don't have any problems then that fiver will continue working for you until you need it, it's your money or your skill.

This is how you build success. One fiver at a time. You have no control over others, no control over the action of others, no control over the markets. Relying on you is the safest way of securing a future.

Richard

Explainer In Chief at Moneytrainers.co.uk

If the financial advice industry had the answers to true financial independence – they'd do it for themselves first. Fact is, this is true.

Advisers don't make people wealthy. You need more than advice and sadly that's a truth the industry won't admit. Knowing how to make sure your second most important resource works is the most important thing you can ever know. ”

Money Trainers is the only UK based Financial Education Business that brings together financial planning, money education and practical money skills in both formal and informal settings.
